SUMMARY

Full-Stack Developer with 1+ year of experience shipping 3 production-grade applications using Next.js, React.js, Prisma ORM, and PostgreSQL. Strong in REST API design, database schema modeling, and full-stack deployment on Vercel. Experienced with real-time dashboards, IoT integrations, blockchain verification, and 3D visualization (Three.js). Focused on clean architecture, performance optimization, and scalable code.

SKILLS

- **Frontend:** HTML5 | CSS3 | JavaScript | React.js | Next.js | Tailwind CSS
- **Backend:** REST APIs | Prisma ORM
- **DataBase:** PostgreSQL | Neon | SQL | Cloudinary
- **Tools:** VS Code | Git | GitHub | n8n | Microsoft Office Suite | Vercel | Postman
- **Languages:** Tamil (Native) | English
- **Soft Skills:** Problem Solving | Teamwork | Time Management

---

PROFESSIONAL EXPERIENCE

Feb 2025 – Present

MATT ENGINEERING SOLUTIONS , NAGERCOIL

Full-Stack Developer

- Built responsive web applications using React.js and Next.js, reducing average page load time by ~30% through code splitting and lazy loading
- Designed and integrated 10+ REST API endpoints with Next.js API Routes and Prisma ORM, handling dynamic data for production applications
- Collaborated in a cross-functional team to deliver clean, user-friendly interfaces with Tailwind CSS, improving UI consistency across 3 projects
- Deployed and maintained applications on Vercel; ensured cross-browser compatibility across Chrome, Firefox, and Safari
- Automated internal workflows using n8n, reducing manual data handling time for the team

---

EDUCATION

B.Sc.Computer Science, **2020-2023**
Manonmaniam Sundaranar University, Tamil Nadu

CGPA : 7.9

CERTIFICATION

Frontend Developer Certification — Greens Technologies, 2024

PROJECTS

ORANGE SURGICALS ECOMMERCE PLATFORM

- Developed a full-stack eCommerce platform “Orange Surgicals” using Next.js for fast and scalable web performance.
- Built and managed backend services with Prisma ORM and Neon PostgreSQL database for secure data handling.
- Integrated Cloudinary for efficient image upload, storage, and optimized delivery.
- Implemented core eCommerce features including product listing, cart functionality, and user interactions.
- Designed a structured full-stack workflow: Frontend → API → Database → Image Storage (Cloudinary)

DIGITAL TWIN – REAL-TIME MOTOR TELEMETRY MONITORING SYSTEM

- Built a real-time telemetry dashboard for monitoring motor speed, temperature, pressure, vibration, and load.
- Created REST API endpoints to store and fetch telemetry data using Prisma and PostgreSQL.
- Integrated dynamic 3D motor visualization in Three.js that reacts to incoming telemetry values.
- Designed full-stack workflow: Frontend → API → Database → Real-Time 3D Simulation.
- Enabled external clients (Postman/IoT) to push telemetry data into the system.

PHARMACHAIN – BLOCKCHAIN & IOT-BASED COLD CHAIN MONITORING SYSTEM

- Built a secure cold-chain monitoring platform integrating IoT sensor logs and blockchain.
- Implemented temperature, humidity, and shock tracking using real-time IoT data.
- Developed tamper-proof package verification with QR/NFC and blockchain-stored integrity keys.
- Improved delivery compliance and transparency through automated validation workflows.
